

Master Sales & Lead Generation Script

Unified Outbound Prospecting, Discovery, & Closing System

Strategic Execution Parameters:

- **Tone:** Enthusiastic, confident, professional, and peer-to-peer (Teacher-to-Student mindset).
- **Leverage Principle:** Maintain control by talking smoothly without giving long, unnatural pauses.
- **Objective:** Secure a 10-minute micro-commitment or guide the merchant directly through the statement evaluation paperwork.

STEP 1: THE CASUAL & TRANSPARENT OPENING

Deliver with an upbeat, high-energy conversational pacing to eliminate initial friction.

You: "Hey, how are you doing today? Great! My name is **[Your Name]** with **Valued Merchant Services**. I just have one quick question for you... You are still accepting credit and debit cards from your customers, right?"

Wait for a brief confirmation, then immediately leverage transparency to disarm them.

You: "Excellent. Look, I'll be honest—this is 100% a sales call. We have two options here: you can ask me to hang up right now, OR you can give me just 30 seconds and I'll tell you exactly why I called. Is that fair?"

STEP 2: THE VERTICAL-SPECIFIC CORE DISCOVERY

Pivot instantly to their specific business vertical to demonstrate direct industry expertise.

Option A: Retail Stores **BOUTIQUES, CONVENIENCE, SPECIALTY RETAIL**

You: "Awesome. I specialize in working with local retail shops right here in the **[City]** area. When I talk to store owners, they usually mention how confusing their monthly rate structures are, delayed funding that ties up daily cash flow, or checkout hardware that lacks tap-to-pay and inventory syncing. Are you seeing any of that with your current processor?"

Option B: Automotive Sector

DEALERS, REPAIR SHOPS, AFTERMARKET

You: "Awesome. I work closely with auto shops and dealerships around [City]. A lot of owners tell me they face massive, unpredictable fees on high-ticket invoices, delayed funding when ordering parts, or outdated systems that won't take mobile payments or integrate with their invoicing software. Does any of that sound familiar to your shop?"

Option C: Wholesalers & Distributors

B2B, SUPPLY LINES

You: "Awesome. I handle payment structures for B2B distributors and wholesalers in our region. The main issues keeping teams up at night are tiered pricing tricks that spike on large orders, slow funding windows that choke working capital, or legacy terminals that won't sync natively with accounting tools like QuickBooks or ERPs. How has your current setup been handling those challenges?"

STEP 3: THE VALUE HOOK & STATEMENT CAPTURE

Introduce the core proposition and pivot directly into capturing data for comparison.

You: "The main reason I'm reaching out is that we have a proprietary program engineered specifically for [Business Type] that eliminates percentage fees, per-item costs, and overall processor junk fees entirely. We're helping local businesses save an average of \$6,500 annually. You would be open to changing your payment processor if we could legally drop your processing bill down to virtually zero, right?"

You: "To see if your business qualifies for this program, when was the last time you actually took a look at your processing statement?"

The 10-Second Effective Rate Formula (For Live Evaluation):

Ask the owner for their last month's *Total Fees Paid* and *Total Processing Volume*.

$$\text{Effective Rate} = (\text{Total Fees Paid} / \text{Total Processing Volume}) \times 100$$

Benchmark: If the calculated rate is **over 2.6%**, they are paying heavily inflated markups and are premium targets for a rate reduction or a Dual Pricing program.

STEP 4: PRESENTING THE CLEAR PROGRAM PATHS

You: "Based on what you are describing, we have two paths we can take:

Option 1 (Rate Optimization): We clean up your existing structure, drop your markup over interchange, and pocket you a few hundred dollars a month in pure savings.

Option 2 (Dual Pricing / Cash Discounting): We update your terminal to seamlessly display cash vs. card pricing. The customer pays the processing cost, completely wiping out your monthly processing bill.

Which of those two options do you want to explore?"

STEP 5: MASTER OBJECTION REBUTTALS & FRIENDLY TURNAROUNDS

Objection 1: "I'm busy / Just send me an email."

The Rebuttal: "I completely understand you're running a business, and I don't want to waste your time. I am emailing you our introductory overview right now. With your permission, let's grab just 10 quick minutes later this week to walk through it and answer your questions. Would Thursday morning or Friday afternoon work better?"

Objection 2: "I don't want to pass fees to my customers / They will get mad."

The Rebuttal: "I felt exactly the same way when these programs first launched a few years ago. I thought customers would get upset. But now, tens of thousands of small businesses across the U.S. use this model daily. It has the same exact impact as a standard, minor inflation price increase. A few people might notice initially, but within a few days, it's business as usual—except you just eliminated a massive operational expense. Plus, we always provide alternative traditional options to ensure you keep your customers completely happy."

Objection 3: "Is this legal? Is it a surcharge?"

The Rebuttal: "Yes, it is 100% legal under the Durbin Amendment of the Dodd-Frank Act, and fully compliant with Visa and Mastercard operating rules. To clarify, this is **not** a credit card surcharge. Surcharging adds a penalty fee at checkout and is banned on debit cards or prohibited by law in several states. Our Cash Discount/Dual Pricing program gives customers a clear choice: pay with card at standard pricing, or receive a discount when paying with cash. We also provide all compliant signage for your door and register automatically."

Objection 4: "I'm happy with my current provider."

The Rebuttal: "That's fantastic to hear! I love working with businesses that value great service. Just to be perfectly clear—I'm not asking you to commit to switching anything today. I'd just love to run a free, side-by-side comparison for you. If nothing else, you'll walk away with absolute certainty that your current provider is giving you the best deal possible, or you'll see exactly how much money is being left on the table. You have nothing to lose and everything to gain."

Objection 5: "Switching hardware is a headache / Potential downtime."

The Rebuttal: "Nobody wants to deal with down terminals or lost sales, which is why our specialized deployment team handles the entire transition for you—from initial data integration to setup and staff training. Most of our businesses are fully operational within 1 to 2 days with zero downtime or disruption to your client checkout flow."

STEP 6: THE CLOSING CALL-TO-ACTION & MICRO-COMMITMENT

Lock down the specific consultation slot or guide them into filling out information directly.

You: "Here is what I suggest: let's schedule a quick 10-minute call or Zoom walkthrough. I'll show you a clear side-by-side comparison, break down your realistic savings, and show you the exact equipment options we provide. It's completely no-obligation. Would tomorrow afternoon or Thursday morning work a little better for you?"

Once agreement or momentum is reached, secure paperwork reviewed together over the phone:

You: "Perfect! With your permission, I'm going to take down a few basic notes on the paperwork now to save us time and review it with you to make sure everything is completely accurate. Are you near a computer or phone where you can look over the document real quick?"
